Technical Specifications

Item Name	Smart door lock
Type	Wi-Fi Enabled IoT Door Lock
Wi-Fi Enabled	Yes (2.4 GHz)
Power Source	Wired
Input Voltage	12V
Max Current	1A
Working Voltage	12V-18V DC
Compatible OS	Android/ iOS
Voice control	No
Key	Standard Key
Suitable for	Inside Opening Doors
Product Dimensions	12.5cm x 9.90cm x 4.40cm
Software	Made in India
Hardware	Made in India
Keys	8 keys
Brass Screws	Small screw 8
Stainless Screws	Stainless Screws 3

UV-EM-LOCK1008

Item in Box

WiFi-Enabled Smart Lock	Operates seamlessly through mobile apps for enhanced convenience and security.
Installation Prerequisites	Before installation, ensure the inching setting is activated via the mobile app. Install the power supply in a covered area to protect it from environmental factors. Avoid using direct current; use an appropriate power source.
Enhancing Event Accessibility	Utilize the deadlock feature within Party Mode to enhance lock system convenience. A deadlock ensures the lock cannot be operated via remote control or mobile app commands.
Universal Compatibility	Suitable for all doors, whether metal or wooden. Can be installed on left- or right-swinging doors, both inside and outside, offering flexibility for any gate.
Installation Guide	Arrange a local welder for metal gates or a carpenter for wooden doors. Provide them with installation videos for guidance.
